What is Claimed:

- A method of protecting humans exposed to sunlight against photoaging, sunburn and skin cancer comprising topically applying to skin of a human a serine protease 5 inhibitor in an amount effective to protect the skin against photoaging, sunburn and skin cancer.
 - The method of claim 1 wherein the serine protease inhibitor is alpha 1-antitrypsin.
- 3. The method of claim 1 wherein the serine protease 10 inhibitor is applied prior to exposure of the skin to sunlight.
 - The method of claim 1 wherein the serine protease inhibitor is applied subsequent to exposure of the skin to sunlight.
- A method of protecting individuals with a heightened 15 sensitivity to the sun from damage resulting from the sun comprising topically applying to the skin of an individuals with a heightened sensitivity to the sun a serine protease inhibitor prior to exposure of the individual to the sun.
- The method of claim 5 wherein the serine protease 6. 20 inhibitor is alpha 1-antitrypsin.
 - A method of protecting humans exposed to sunlight against photoaging, sunburn and skin cancer comprising topically applying to skin of a human milk or a product derived from milk.
 - A pharmaceutical composition for prevention of photoaging and other sun-damage comprising a serine protease inhibitor, a second sunscreen or free radical scavenger, and a pharmaceutical additive.
